

# WARN. Care Calls

## Reassurance Program

**W.A.R.N.** Care Calls technology closes the communications loop between government, senior citizens, the handicapped and their caregivers.

With federal cost shifts to municipalities resulting in shrinking budgets for local municipal and county services, it's more important than ever to find solutions that save money, reduce overhead, and increase the flow of communication between government and its constituents in need.

W.A.R.N. Care Calls provides an easy-to-use, effective and affordable way for local government to reduce costs associated with their citizen reassurance programs, and to dramatically improve their outreach to the elderly and handicapped.

With W.A.R.N. Care Calls, you can create and send personalized notifications to thousands of seniors as well as to critical civil emergency services. There's no hardware to purchase, software to install or formal training necessary.

And W.A.R.N. Care Calls helps to keep first responders out of the direct elder care cycle. The elderly and handicapped are confirmed daily and automatically. Emergency crews are only dispatched after a series of contact attempts to subject & caregivers.

## Key W.A.R.N. Care Call Features:

W.A.R.N. Care Calls:

- Tracks Response Instantly
- Re-calls 'No Answers' quickly
- Escalates to "Caregivers"
- Registers Caregiver Response
- Reports back to Ops Center
